KESWICK SPA

JANUARY

Renewal Spa Special

It's a New Year and a great time to indulge in a spa experience that will offer a new, refreshing glow to your skin. This treatment uses lymphatic drainage to eliminate toxins and induce muscle stimulation to tone and lift the face and neck. Through a stimulating micro current, there is an improvement in lymph node and blood circulation. With this, cellular activity is increased as the cells become more oxygenated and energized. After one treatment, lifting of the face is visible along with a more radiant complexion.
